

RODA

SUNGLASS 002 Coffee table

design RODOLFO DORDONI

DESCRIPTION

Coffee table for outdoor use.

STRUCTURE

Aluminium frame treated with electrostatic powder painting with polyester base that gives more protection from scratches and also the final coloring to the product.

TOP

RIBBED GLASS: glossy laminated stratified glass, made up of two 4mm high sheets each, one in extra-crystal and one in crystal flutes. Between the two slabs is applied a vinyl safety film that intervenes in the event of glass breakage that does not abandon its seat, risking endangering objects or nearby people. The result is the formation of a characteristic spider web at the moment of impact.

BRONZED GLASS: hardened glass, 8mm high, polished brass bronze coloured.

LOWER TOP

FARSENA STONE: it has a typical gray/brown color and a uniform structure with shades of red and salts. The brushed finish and the stain-resistant treatment with opaque effect preserve the natural appearance of the stone and its pleasantness to the touch.

LUNA STONE: sandstone with a typical grey/light blue color.

CARRARA MARBLE: a metamorphic stone made of crystals and carbonate of microscopic size which gives a uniform aspect.

HPL (High pressure laminate) of a great quality with a characteristic black heart, very resistant to wear and tear, humidity, steam, UV, fungi, spores and mould. It is self-extinguishing and it is class 2 fire resistant; it does not contain chlorine or asbestos and it is certified by Fira Institute for coming in contact with foodstuff.

WEIGHT

Glass 17,5 kg

Glass/HPL lower top 25,5 kg

Glass/stone lower top 38,5 kg
