EDEN Sofa composition

design RODOLFO DORDONI

DESCRIPTION

Sofa composition for outdoor use.

STRUCTURE

AISI 304 stainless steel frame treated with electrostatic powder painting with polyester base that gives more protection from scratches and also the final coloring to the product.

Teak wood is a natural weather resistant material with a compact structure, ideally suited for outdoor use. A number of brushing and coating cycles enhance its natural properties of impermeability and resistance to the atmospheric agents, while at the same time preserving and exalting its characteristic vein pattern. The special colour nuances obtained with this process give the wood a refined, stylish finish.

BATYLINE

Technical fabric made of a PVC-coated polyester wire grid bearing membrane. This material combines excellent technical performance with a high aesthetic value. The special textile construction makes it very resistant to weathering and ensures quick drying.
