

RODA

DANDY Sofa composition

design RODOLFO DORDONI

DESCRIPTION

Sofa composition for outdoor use.

DANDY is the new revolutionary outdoor system by RODA, which includes all the functions of a textile sofa for indoor use, so intimate and familiar, in a completely new proposal for outdoor. DANDY is characterized by the versatility of its design, the technological innovation processes and the highest quality of materials used.

The "soul" of DANDY consists of an aluminum frame, lightweight but extremely strong, hidden by a padding with a "total outdoor technology" completely draining, breathable, and weather resistant. DANDY's covers are available in a wide range of fabrics, with an outstanding natural beauty and an appealing color palette. The covers, fixed to the structure, are easily removable to be stored during the winter season, or to be cleaned.

DANDY is a modular project that allows multiple compositions, in order to meet the various needs of customization and space.

The seating modules, to be also used as big-sized poufs, are available in three dimensions and are suitable for any context, from the most intimate and cozy, to the widest and lively, from private to contract.

STRUCTURE

Aluminium coated with a polyester paint; 304 stainless steel hardware; adjustable feet.

PADDING

Made by three different types of open-cell polyurethanes enclosed in a 3D net; the padding is fixed to the structure by elastic belts in syntetic rubber.

FABRIC COVER

Made with outdoor fabrics; with filtering profiles. All the elements of the sofa DANDY are sold exclusively with textile cover.

STORAGE COVER

Available.
