NETWORK 168 Lounge chair

design RODOLFO DORDONI

DESCRIPTION

Lounge chair for outdoor use.

STRUCTURE

Teak: Teak wood contains a natural oily resin which makes it extremely resistant to weather, temperature, parasite attacks and insects. The exposure outdoor creates a 1/2 mm-thick oxidation patina on the wood surface which favors its discoloration to a silver-grey color; this change does not affect its original characteristics in any way. The grey patina can be avoided or removed with the correct maintenance.

BELTS

Double-twisted 100% polyester or acrylic thread, in cotton finishing; they have great toughness and great resilience, high resistance to abrasion, to heat, to bending stress, high modulus of elasticity, minimal wet regain, good resistance to chemical agents and to bad weather conditions; color fastness to light of 7 in the blue scale (maximum: 8); as the time goes by, the exposition to extreme weather conditions may cause a discoloration of the threads.

WEIGHT

Structure: 11 kg
Cushion: 0,3 kg
